Preface

This Code aims to include as many high-quality tags and elemental magic as possible.

It is a **free, open-source** code of law, and anyone is welcome to contribute to the compiler to document their magic.

If you find non-English separators, misspelled words, weird carriage returns, or even anything that doesn't seem to be explained by science – don't worry, it's all *part of the spell*.

All materials in this article are free to be cited.
